Sliding safety gate, 1500 mm – DPK VZ150

PROPERTIES:

Material: steel

Colour: yellow

Handling equipment: electric pallet jack

Impact resistance: increased

Length: 3700 mm

Height: 1100 mm

Gate dimensions: 1500 x 640 mm

Column dimensions: 100 x 100 mm

Crossbar length: 2000 mm

Wall thickness: 3 mm

Foot dimensions: 180 × 180 × 10 mm

Weight: 83 kg

Surface treatment: powder paint

Suitable use: indoor and outdoor areas

PRODUCT DESCRIPTION:

The 150 cm sliding safety gate is part of the modular DPK system, which can be adapted to the individual requirements of your facility. The surface is finished with a powder coating. The use of yellow traffic paint RAL 1023 ensures high visibility of the system and draws attention to potential obstacles, thereby significantly contributing to operational safety.

USE:

The sliding safety gate is designed to delineate pedestrian walkways when entering so-called *NO-GO* zones, both indoors and outdoors. The set includes screw-mounted brackets that allow you to create a angle/central post and thus connect the barrier to a specific DPK modular system.
